

## *Electrical Technician (LEW Grade 8)*

Are you looking for a meaningful career that makes a difference in the world?

Then consider joining LYS Energy's team where you will do just that. At LYS Energy, we want to attract the industry's best and brightest talents to help us achieve our vision to be the pioneer in generating solar energy in a sustainable way for the benefits of the entire ecosystem and in all verticals we service.

We are currently seeking an [Electrical Technician \(LEW Grade 8\)](#) with strong background in [Electrical engineering](#).

### **Key Roles & Responsibilities**

The Electrical Technician (LEW Grade 8) will be responsible for the electrical design and engineering

- Electrical Technician (LEW Grade 8) with good engineering practice and in compliance with CP5/SS638, IEC, and regulatory codes relevant to Solar PV Installations
- Supervise and perform electrical works
- Provide technical support to project manager and maintenance team
- Perform inspection on electrical tools and equipment
- Perform fault-finding in electrical system in particular AC connections
- To install, maintain and repair electrical wiring, equipment, and fixtures
- Provide design for electrical layout including single-line diagrams and interconnection details
- Assists to review electrical drawing including single-line diagrams and interconnection details
- Provide engineering support as needed to the project development and project management teams
- Experience in SP submissions for solar PV system Turn On is a plus

## Job Requirements/ Qualifications

- Must have license as an electrician (LEW Grade 8) under Energy Market Authority
- Degree or Polytechnic Diploma in Electrical Engineering/Clean Energy/Renewable Energy
- Minimum 3 years of experience working in electrical field preferred
- Experienced in Solar PV system design is a plus
- Able to read electrical drawing
- Possess good knowledge and skills in electrical works and systems

## Ideal Profile/ Personal Characteristics

- Motivated self-starter and fast learner, ability to multi-tasks;
- Need for Excellence;
- Persistent, driven and goal-oriented;
- Team player who works well across departments;
- Good balance between technical knowledge and people management capabilities;
- Total transparency and straightforwardness

- Able to multi-task and manage several projects simultaneously
- Keen to learn and have the passion for Renewable Energy

## About LYS Energy Solutions:

LYS Energy is a Singapore-based Independent Power Producer (IPP). We develop, finance, install and operate Solar Systems for Commercial, Industrial and Public sites throughout Southeast Asia and help organizations go green smoothly without risks whilst providing more independence and predictable utility costs.

At LYS Energy, we believe that moving towards a more sustainable energy mix using Solar production systems can greatly contribute to the transition of Southeast Asia to a low-carbon future.

We also believe that supporting this move towards green, efficient and smart distributed energy systems can make perfect economic sense and deliver rapid tangible value to our customers.
