

Project Manager | Indonesia

Are you looking for a meaningful career that makes a difference in the world?

Then consider joining LYS Energy (LYS) team where you will do just that. We want to attract the industries' best and brightest talents to help us achieve our vision to be a vector of the energy transition by re-inventing the energy industry towards a customer-centric prosumer era, in a sustainable way for the benefits of the entire ecosystem and in all verticals we service.

We are currently seeking a dynamic Project Manager with a track record to help sustain the growth of the Company, playing an active role in the development, construction, and execution of the projects.

You will get the support of other members of LYS Energy to complete the deliverables and engage as a team with the various stakeholders. You will be asked to focus your activities on Singapore and the nearby countries.

Role & Responsibilities

Project Design/ Planning/ Management

- Form and manage core project team which consists of Site Manager, Safety, and Project Admin.
- Prepare and validate technical drawing, project schedule, bill of material, budget and cashflow projection, workload forecast and other necessary project requirements.
- Liaise and discuss with client, suppliers, subcontractors and any other stakeholder to ensure smooth project execution. Manage all third parties and stakeholders involved in project.
- Manage budget and schedule of the project to ensure compliance with contract and scope of work.
- Coordinate procurement activities to ensure all equipment are delivered in a timely manner and are in line with project specifications and budget.
- Ensure strict quality assurance and quality control throughout the construction phase.
- Propose and implement solutions for problems identified during project execution.

- Lead testing & commissioning activities.
- Compile and present final project report to both internal and external parties.
- Manage and monitor all projects implementation activities, including:
 - Continual monitoring of installed systems for performance management and optimization;
 - Investigating and resolving field problems in coordination with customers, contractors, consortium partners;
 - Supervision of Maintenance activities
- Provide feedback of products defects and non-quality issues for future corrections and procurement.
- Maintain good working relationship with customers & partners' technical and operational teams, to provide customer care and to ensure permanent customer satisfaction.
- Ensure reporting and coordination with the headquarters team in Singapore.

Job Requirements/ Qualifications

- Higher professional degree in engineering field relevant for solar PV projects (M.Sc. or B.Sc.)
- Industry background and more than 3 years of work experience in power utilities, engineering or EPC companies or power sector consulting companies.
- Proven track record in Project, Project Controls, Supply chain management, HSE.
- Experience in project management and wholistic execution function.
- Good technical understanding of solar PV technology.
- Travelling within the country will be required.

Ideal Personal Characteristics

- Persistent, driven and goal oriented.
- Motivated self-starter and fast learner, ability to multi-task under pressure.
- Excellent organizational skills, attention to details.
- Excellent command of English, written and spoken.
- A team player and team driver.

About LYS Energy Solutions:

LYS ENERGY (www.lysenergy.com) is the first Singapore-based Solar Independent Power Producer that builds, owns, and operates solar photovoltaic systems in the Asia Pacific region. It offers the full range of solar services to install solar energy systems for commercial, industrial, and public sites.

LYS ENERGY is a wholly owned by LEADER ENERGY Group with Headquarter in Penang, Malaysia. LEADER ENERGY owns and operates a diverse portfolio of power generation and transmission assets in Cambodia, Vietnam, Malaysia, Singapore, and Taiwan.

LEADER ENERGY

GROUP OF COMPANIES IN SINGAPORE

LYS Energy provides Asia's trusted Renewable Energy platform offering hassle-free end-to-end clean energy solutions for businesses: from zero-capex solar energy (PPA), Renewable Energy Certificates (RECs), turnkey Engineering Procurement Construction (EPC) and Operations & Maintenance (O&M) services, to carbon emissions and energy management consulting.

Since its incorporation, LYS has deployed over 50MWp of high-performance solar PV systems, with a pipeline of over 500MWp in Singapore and across the region in Vietnam, Indonesia, Malaysia, Thailand.
