

Project Manager | Singapore

Are you looking for a meaningful career that makes a difference in the world?

Then consider joining LYS Energy (LYS) team where you will do just that. We want to attract the industries' best and brightest talents to help us achieve our vision to be a vector of the energy transition by re-inventing the energy industry towards a customer-centric prosumer era, in a sustainable way for the benefits of the entire ecosystem and in all verticals we service.

We are currently seeking a dynamic Project Manager based in Singapore with a track record to help sustain the growth of the Company, playing an active role in the development, construction, and execution of the projects.

You will get the support of other members of LYS Energy to complete the deliverables and engage as a team with the various stakeholders. You will be asked to focus your activities on Singapore and the nearby countries.

Role & Responsibilities

Project Design/ Planning/ Management

- Develop planning, scheduling and workload forecasting to optimize allocation of resources to fulfil all milestones & objectives in due time
- Liaise with EPC and other industrial partners
- Factory Acceptance Test/inspections
- Anticipate and analyze delays and propose corrective action plans
- Implement all required Key Performance Indicators (KPI)
- Oversee proper controls to ensure that goals are achieved, and generate activity progress reports addressing all project/issues with updated project planning, workload forecasts and all required indicators (respect of budget, milestones, etc.)
- Secure the commissioning of projects
- Ensure Project adheres to quality and process requirements

- Ensure reporting and coordination with the project management team in Singapore

Project Operations/ Monitoring

- Manage and monitor all projects implementation activities, including:
 - Continual monitoring of installed systems for performance management and optimization
 - Investigating and resolving field problems in coordination with customers, contractors, consortium partners
 - Supervision of Maintenance activities
- Provide feedback of products defects and non-quality issues for future corrections and procurements
- Maintain good working relationship with customers & partners' technical and operational teams, to provide customer care and to ensure permanent customer satisfaction

Performance Optimisation

- Support the identification, development and continuous improvement of work processes, tools, and templates used to deliver technical support to our clients
- Maintain expert knowledge of competitors' technical offering and innovative product development (including global best practices outside Indonesia: Asia Pacific, US, Europe...)
- Screen and recommend potential technical partners
- Suggest innovation to increase systems performance and continually reduce costs

Contribution to Company's Development (HR)

- Evaluate staffing and training needs for technical teams
- Participate to the recruitment, on-boarding and training of new technical staff
- Manage junior project managers' career development

Contribution to Company's Development (Marketing)

- Increase awareness of our solutions, capabilities and expertise;
- Participate to PR & Networking events (conferences, exhibitions...) as needed;
- Report on potential commercial opportunities and communicate any impactful news or events;

Job Requirements/ Qualifications

- Higher professional degree in engineering field relevant for solar PV projects (M.Sc. or B.Sc.)
- Building Construction Supervisor (BCSS)
- Managing Work & Height (WAH)
- 2-4 years of experience in EPC, Engineering or Construction or M&E
- Knowledge of the SS:638, preferable
- Proven track record in Project, Project Controls, Supply chain management, HSE
- Experience in project management and wholistic execution function
- Experience in supervising subcontractors/suppliers

- Knowledge of the Renewable Energy and Solar industry will be a key advantage
- Good technical understanding of solar PV technology
- Travelling within the country will be required

Ideal Personal Characteristics

- Excellent team player who works well across departments
- Ability to take ownership and work independently under light supervision. Resourceful and self-driven.
- Ability to multi-task under pressure
- Adaptable and resilient
- Persistent and goal-oriented. Hard and fast worker.
- Excellent verbal and written communication skills in English

About LYS Energy Solutions:

LYS ENERGY (www.lysenergy.com) is the first Singapore-based Solar Independent Power Producer that builds, owns, and operates solar photovoltaic systems in the Asia Pacific region. It offers the full range of solar services to install solar energy systems for commercial, industrial, and public sites.

LYS ENERGY is a wholly owned by LEADER ENERGY Group with Headquarter in Penang, Malaysia. LEADER ENERGY owns and operates a diverse portfolio of power generation and transmission assets in Cambodia, Vietnam, Malaysia, Singapore, and Taiwan.

LYS Energy provides Asia's trusted Renewable Energy platform offering hassle-free end-to-end clean energy solutions for businesses: from zero-capex solar energy (PPA), Renewable Energy Certificates (RECs), turnkey Engineering Procurement Construction (EPC) and Operations & Maintenance (O&M) services, to carbon emissions and energy management consulting.

Since its incorporation, LYS has deployed over 50MWp of high-performance solar PV systems, with a pipeline of over 500MWp in Singapore and across the region in Vietnam, Indonesia, Malaysia, Thailand.
